FPi**600**

Table-top Inserting System FPi600

Table-top Inserting System FPi600

The new table-top inserting system FPi600 As the successor to the long-running and internationally successful FPi500, the FPi600 sets the standard for entry level, fully automatic mail processing.

Feed, fold, insert and seal: the ultimate inserting solution for smaller offices.

FOLD AND INSERT AUTOMATICALLY TO SAVE TIME

Variable: Use the FPi600 to quickly and easily add response-cards, flyers or return envelopes to your mailing. Or use the folding function to produce pre-folded flyers.

Powerful: The FPi600 can handle up to 1,350 letters in an hour. The integrated double-feed monitor reliably prevents errors and the clam-shell construction assures maximum ease of access for servicing.

Office friendly: This amazingly quiet, compact table-top inserting system offers high performance in a small package and fits into every office. The FPi600 has eco-features such as the power saving standby mode and automatic power-off function
EASY TO USE

The central control panel with a colour touchscreen is intuitively simple to understand and use.

Just load your letter, supplements and envelopes into the appropriate feeders and let the display guide you through the inputs.
The FPi 600 automatically folds and inserts the material and then seals the envelope. Recurring jobs (document sequence, type of fold, fold location, address position etc) can be saved and retrieved at the press of a button.
The foldable letter catch tray can be quickly set from C6/5 to C5 envelopes.

EASY FEEDING
RELIABLE
USER-FRIENDLY
FITS IN ANY OFFICE

✉ Automate 90% of your jobs

- 2 documents
- 1 supplement/return envelope
- C6/5 or C5 envelopes
- miscellaneous mail

✉ Maximum flexibility

Each material feeder can hold up to 100 sheets. With the tandem function, the machine continues operation when one station is empty to streamline reloading for bigger mailings.

✉ Perfect for "mixed mail"

Manually feed up to five sheets of material, and add a supplement automatically from another station.

✉ And if there's ever a paper jam – no problem!

Just open the machine like you would a photo-copier, remove the jammed item and restart your job.

The right fold can transform a sheet of A4 into a little brochure.

Or the perfect mailing. Select from three popular folding styles: single, letter, double-parallel (left to right) or no fold.

FPi600

Table-top Inserting System FPi600

Standard Features & Functions

Capacity – Feeder Stations	
Automatic station (80 g/m^2)	100
Supplement feeder	200 supplements or 100 return envelopes
